For immediate release: 2/1/2024

****Rust Automation & Controls, Inc. has partnered with Trimteck® to offer best-in-class Engineered Solutions for Process Control.****

West Jordan, UT - Today marks a milestone as Rust Automation & Controls, Inc. proudly announces its strategic partnership with Trimteck®, solidifying a collaboration aimed at delivering comprehensive control valves tailored for critical applications. This partnership represents a fusion of expertise and innovation, combining Rust Automation & Controls' cutting-edge solutions with Trimteck®'s renowned precision in control valves.

Of the announcement, Rust Automation & Controls President and CEO Grant Rust said, "I am very pleased to be adding the Trimteck line of products to our portfolio. We work diligently to bring the best solutions to our customers throughout the Western U.S."

Of the announcement, Trimteck® President Christian Conesa said, "We are delighted to be embarking on this journey with Rust Automation & Controls. For Trimteck®, our sales channel partners are an essential element in being able to bring value to our customers. With Rust we have found not only a well-established and technically-savvy partner to represent us in the Mountain West, but an organization that shares our values of focusing on the customer with urgency and integrity. I look forward to a long and fruitful partnership that will ultimately most benefit industrial customers in the territory".

About Rust Automation & Controls, Inc:

Rust Automation & Controls, Inc. has grown its business by incorporating strategies to attract, engage, and delight customers. Established in 1976, Rust Automation & Controls has over 48 years of experience providing a comprehensive range of products and solutions in the Western United States. We represent the world's finest manufacturers of Valving and Instrumentation products. www.rustco.com.

About Trimteck®:

Trimteck® believes that people and the environment are safer, cleaner, and more productive if their customers can improve quality, optimize throughput, gather testing data, and reduce emissions by accurately controlling flows, pressure, and temperatures in their industrial processes. They provide customers worldwide with high quality, reliable, innovative, and American-made flow, temperature, and pressure control valves for the most difficult applications in industry. The company prides itself on its applications expertise, the superior performance and longevity of its products, and a culture committed to responsive services and delighting its customers. www.trimteck.com.
